

Getting setup -- Installing additional Docker tools

Download Docker Compose

```
curl -L  
https://github.com/docker/compose/releases/download/1.25.4/docker-com  
pose-Linux-x86\_64 > /tmp/docker-compose
```

Make docker-compose executable

```
chmod +x /tmp/docker-compose
```

Put dockercompose on your system path

```
sudo mv /tmp/docker-compose /usr/local/bin
```

Verify that you can access it

```
docker-compose --version
```
